

# Sprint 1 Review

**Sprint Goal:** Deliver core CRUD functionality and establish CI/CD pipeline

**Sprint Duration:** Sprint 1

**Date:** February 19, 2026

## Completed User Stories

### US-1: Create a Task

**Story Points:** 3

**Acceptance Criteria Met:**

- API endpoint POST /tasks accepts title (required) and description (optional)
- System returns created task with unique ID and timestamp
- Title must be a non-empty string
- Invalid requests (missing title) return 400 error with message

**Demo:**

```
curl -X POST http://localhost:3000/tasks \
-H "Content-Type: application/json" \
-d '{"title": "Learn Node.js", "description": "Complete tutorial", "priority": "high"}
```

**Response:**

```
{  
  "id": 1,  
  "title": "Learn Node.js",  
  "description": "Complete tutorial",  
  "completed": false,  
  "priority": "high",  
  "createdAt": "2026-02-19T18:50:00.000Z",  
  "updatedAt": "2026-02-19T18:50:00.000Z"  
}
```

## US-2: List All Tasks

**Story Points:** 2

**Acceptance Criteria Met:**

- API endpoint GET /tasks returns array of all tasks
- Returns empty array [] if no tasks exist
- Each task includes id, title, description, completed status, priority, and timestamps

**Demo:**

```
curl http://localhost:3000/tasks
```

**Response:**

```
[  
  {  
    "id": 1,  
    "title": "Learn Node.js",  
    "description": "Complete tutorial",  
    "completed": false,  
    "priority": "high",  
    "createdAt": "2026-02-19T18:50:00.000Z",  
    "updatedAt": "2026-02-19T18:50:00.000Z"  
  }  
]
```

# US-3: View Single Task

**Story Points:** 2

**Acceptance Criteria Met:**

- API endpoint GET /tasks/:id returns single task object
- Returns 404 error if task with given ID does not exist
- Response includes all task fields

**Demo:**

```
curl http://localhost:3000/tasks/1
```

**Response:**

```
{
  "id": 1,
  "title": "Learn Node.js",
  "description": "Complete tutorial",
  "completed": false,
  "priority": "high",
  "createdAt": "2026-02-19T18:50:00.000Z",
  "updatedAt": "2026-02-19T18:50:00.000Z"
}
```

**404 Error Demo:**

```
curl http://localhost:3000/tasks/999
```

**Response:**

```
{
  "error": "Task not found"
}
```

# Additional Deliverables

## CI/CD Pipeline

- GitHub Actions configured with `.github/workflows/ci.yml`
- Pipeline runs on push and pull requests to `main`
- Tests against Node.js 18.x and 20.x
- First pipeline run: **PASSED**

**Pipeline URL:** <https://github.com/illonaaddae/task-manager-api-assessment/actions>

## Automated Tests

- 21 tests written using Jest + Supertest
- All tests passing
- Code coverage: 91%+

**Test Results:**

```

task-manager-api on ⚡ main [↓] is 📦v1.0.0 via ● v24.11.0
❯ npm run test:tasks.test.js
Task API
  POST /tasks
    ✓ should create a task with title and description (113 ms)
    ✓ should create a task with only title (description optional) (16 ms)
    ✓ should create a task with custom priority (11 ms)
    ✓ should return 400 if title is missing (27 ms)
    ✓ should return 400 if title is empty string (20 ms)
    ✓ should return 400 for invalid priority (18 ms)
  GET /tasks
    ✓ should return empty array when no tasks exist (15 ms)
    ✓ should return all tasks (45 ms)
    ✓ should return tasks with all required fields (21 ms)
  GET /tasks/:id
    ✓ should return a task by ID (19 ms)
    ✓ should return 404 for non-existent task (14 ms)
    ✓ should return 400 for invalid task ID (15 ms)
  PATCH /tasks/:id
    ✓ should update task title (18 ms)
    ✓ should mark task as completed (19 ms)
    ✓ should update task priority (16 ms)
    ✓ should return 404 for non-existent task (15 ms)
    ✓ should return 400 for invalid priority (28 ms)
  DELETE /tasks/:id
    ✓ should delete a task (30 ms)
    ✓ should return 404 for non-existent task (17 ms)
    ✓ should return 400 for invalid task ID (15 ms)
  GET /health
    ✓ should return healthy status (6 ms)

Tests:      21 passed, 21 total
Snapshots:  0 total
Time:       2.136 s
Ran all test suites.

```

## Version Control

### Commit History (Incremental Delivery):

3e610d7 Add README with setup and API documentation  
55e7696 Add GitHub Actions CI pipeline and comprehensive tests  
5d43b21 Add Express app structure with task CRUD endpoints  
913d652 Initial project setup: npm init, Express, Jest, Supertest

## Sprint Metrics

Metric	Value
Planned Story Points	7
Completed Story Points	7
Velocity	100%
Tests Written	21
Code Coverage	91%+
Pipeline Status	Passing

## Definition of Done Checklist

- Code is committed to the main branch
- Unit tests written and pass successfully
- CI pipeline runs without failures
- All acceptance criteria verified
- Code follows project conventions
- No critical bugs remain
- README updated with setup instructions
